## **FİNANSBANK ANONİM ŞİRKETİ**

### **INDEPENDENT ACCOUNTANT'S LIMITED REVIEW REPORT FOR THE INTERIM PERIOD JANUARY 1 – MARCH 31, 2010**

We have reviewed the accompanying balance sheet of Finansbank A.Ş. ("The Bank") as of March 31, 2010 and the related statements of income, cash flows and changes in shareholders' equity for the period then ended. These financial statements are the responsibility of the Bank's management. As independent accountants our responsibility is to issue a report based on the review performed on these financial statements.

We conducted our review in accordance with the accounting rules and policies, and the accounting and auditing standards, set out as per the Banking Act No: 5411. Those standards require that we plan and perform the review to obtain limited assurance as to whether the financial statements are free of material misstatement. A review is limited primarily to reviewing financial statements by applying analytical procedures, inquiring as to the integrity of the financial statements and making inquiries of management to obtain information, it is substantially less in scope than an audit and therefore provides a lesser assurance. We have not performed an audit and, accordingly, we do not express an audit opinion.

Based on our review, nothing has come to our attention that causes us to believe that the accompanying financial statements are not presented fairly, in all material respects, the financial position, the results of its operations and its cash flows, of Finansbank A.Ş. for the period ended March 31, 2010 in accordance with the prevailing accounting principles and standards set out as per the Article No: 37 of the Banking Act No: 5411, and other regulations, communiqués and circulars in respect of accounting and financial reporting and pronouncements made by the Banking Regulation and Supervision Agency.

Additional paragraph for English translation:

The effect of the differences between the accounting principles summarized in Section 3 and the accounting principles generally accepted in countries in which the accompanying financial statements are to be distributed and International Financial Reporting Standards (IFRS) have not been quantified and reflected in the accompanying financial statements. The accounting principles used in the preparation of the accompanying financial statements differ materially from IFRS. Accordingly, the accompanying financial statements are not intended to present the Bank's financial position and results of its operations in accordance with accounting principles generally accepted in such countries of users of the financial statements and IFRS.

**NOTES TO FINANCIAL STATEMENTS AS OF MARCH 31, 2010**

*(Amounts expressed in Thousands of Turkish Lira (TL) unless otherwise stated.)*

**SECTION THREE**

**ACCOUNTING POLICIES**

**I. Basis of presentation**

**1. Preparation of the financial statements and the accompanying footnotes in accordance with Turkish Accounting Standards and Regulation on Principles Related to Banks' Accounting Applications and Maintaining the Documents**

The Turkish Banking Law No 5411 is published in the Official Gazette No 25983 dated November 1, 2005. The Bank prepared the accompanying financial statements as of March 31, 2010 and the related disclosures and footnotes in accordance with accounting and valuation standards as described in the "Regulation on Principles Related to Banks' Accounting Applications and Maintaining the Documents", dated November 1, 2006 which is published in the Official Gazette No 26333, "Communique on Financial Statements and the Accompanying Explanations and Footnotes to be Announced to the Public", dated February 10, 2007 which is published in the Official Gazette No 26430, Turkish Accounting Standards (TAS), Turkish Financial Reporting Standards (TFRS) and other circulars, comminiques and pronouncements in respect of accounting and financial reporting made by the Banking Regulation and Supervision Agency (BRSA).

Financial statements and the related disclosures and footnotes have been presented in thousands of Turkish Lira unless otherwise specified.

**2. Classifications**

The Bank classified TL 7,634 fees and commissions income from cash loans which was accounted for under "Net Fees And Commissions Income" as of March 31, 2009 to "Interest Income" to be consistent with the classification of current period's Income Statement.

**3. Accounting policies and valuation principles used in the preparation of the financial statements**

Accounting policies and valuation principles used in the preparation of the financial statements are determined and applied in accordance with the requirements of TAS, TFRS, "Regulation on Principles Related to Banks' Accounting Applications and Maintaining the Documents", dated November 1, 2006 which is published in the Official Gazette No 26333, "Communique on Financial Statements and the Accompanying Explanations and Footnotes to be Announced to the Public", dated February 10, 2007 which is published in the Official Gazette No 26430 and other regulations, circulars, communiqués and pronouncements in respect of accounting and financial reporting made by BRSA.

**Explanation for Convenience Translation to English**

The accounting principles used in the preparation of the accompanying financial statements differ from International Financial Reporting Standards (IFRS). The effects of the differences between these accounting principles and the accounting principles generally accepted in the countries in which the accompanying financial statements to be used and IFRS have not been quantified in the financial statements.

**II. Strategy for the use of financial instruments and the foreign currency transactions**

**1. Strategy for the use of financial instruments**

The major funding sources of the Bank are customer deposits and funds borrowed from international markets. The customer deposits are with fixed rate and have an average maturity of 1-3 months. Funds borrowed from abroad are generally with floating rates and are repriced at an average period of 3-6 months. The Bank diverts its placements to assets with high return, sufficient collaterals. The Bank manages the liquidity structure to meet its liabilities when due by diversifying the funding sources and keeping sufficient cash and cash equivalents. The maturity of fund sources and maturity and yield of placements are considered to the extent possible within the current market conditions and higher return on long-term placements is aimed.

Among the operations of the Bank, the main activities generating yields higher than the calculated average yields are credit card transactions.

Besides customer deposits, the Bank funds its long term fixed interest rate TL loan portfolio with long term (up to 10 years) floating interest rate foreign currency funds obtained from international markets. The Bank converts the foreign currency liquidity obtained from the international markets to TL liquidity with long term swap transactions (fixed TL interest rate and floating FC interest rate). Thus, the Bank generates TL denominated resources for funding long term loans with fixed interest rates.

The Bank has determined securities portfolio limits based on the market risk limitations for money, capital and commodity markets. Products included in the securities portfolio are subject to position and risk limits. Position limits restrict the maximum nominal position based on the product. Risk limits are expressed in terms of "Value at Risk (VAR)" by taking the risk tolerance as a cap. The maximum VAR amounts are determined for the three main risk factors, which affect the securities portfolio that is subject to market risk, as well as determining the risk tolerance based on the total value at risk. The above mentioned limits are revised annually.

The strategies for hedging exchange rate risk generated from the Bank's foreign currency available-for-sale investment securities are explained in foreign currency risk section and the applications regarding the hedging of interest rate risk generated from deposits with fixed or floating interest rates are explained in the Interest Rate Risk section in detail.

Hedging strategies for foreign exchange risk resulting from other foreign currency transactions are explained in the foreign currency risk section.

**2. Foreign currency transactions**

**2.1. Foreign currency exchange rates used in converting transactions denominated in foreign currencies and presentation of them in the financial statements**

The Bank accounts for the transactions denominated in foreign currencies in accordance with TAS 21 "The Effects of Changes in Foreign Exchange Rates". Foreign exchange gains and losses arising from transactions that are completed as of March 31, 2010 are translated to TL by using historical foreign currency exchange rates. Balances of the foreign currency denominated assets and liabilities except for non-monetary amounts, are translated into TL by using foreign currency exchange rates of the Bank and the resulting exchange differences are recorded as foreign exchange gains and losses. The Bank's foreign currency exchange rates for the related period ends, are as follows:

	<u>March 31, 2010</u>	<u>December 31, 2009</u>
US Dolar	TL 1.5215	TL 1.5057
Euro	TL 2.0523	TL 2.1603

**Finansbank Anonim Şirketi**

**NOTES TO FINANCIAL STATEMENTS AS OF MARCH 31, 2010**

*(Amounts expressed in Thousands of Turkish Lira (TL) unless otherwise stated.)*

**2.2. Foreign exchange gains and losses included in the income statement**

The net foreign exchange gains included in the income statement as of March 31, 2010 is TL 21,925 (March 31, 2009 – TL 10,686 net foreign exchange losses).

**III. Information on associates and subsidiaries**

Associates and subsidiaries are accounted for in accordance with the principles in TAS 39 “Financial Instruments: Recognition and Measurement” in the unconsolidated accompanying financial statements. Associates and subsidiaries that do not have a quoted market price in an active market or whose fair value cannot be reliably measured are recorded at cost after deducting related impairment provision.

**IV. Explanations on forwards, option contracts and derivative instruments**

The Bank enters into forward currency agreements and swap transactions to reduce the foreign currency risk and interest rate risk and manage foreign currency liquidity risk. The Bank also carries out currency and interest options, swaption, and credit default swap and futures agreements.

The Bank funds its long term fixed interest rate TL loan portfolio with long term (up to 10 years) floating interest rate foreign currency funds obtained from international markets. The Bank changes the foreign currency liquidity obtained from the international markets to TL liquidity with long term swap transactions (fixed TL interest rate and floating FC interest rate). Therefore, the Bank not only funds its long term fixed interest rate loans with TL but also hedges itself against interest rate risk.

In accordance with TAS 39 “Financial Instruments: Recognition and Measurement”, forward foreign currency purchase/sale contracts, swaps, options and futures are categorized as “hedging purpose” or “trading purpose” transactions. Derivatives are initially recognized at cost including the transaction costs. Also, the liabilities and receivables arising from the derivative transactions are recorded as off-balance sheet items at their contractual values. The derivative transactions are accounted for at fair value subsequent to initial recognition and are presented in the “Assets on Trading Derivatives” and “Liabilities on Trading Derivatives” or “Assets on Hedging Purpose Derivatives” and “Liabilities on Hedging Purpose Derivatives” items of the balance sheet depending on the resulting positive or negative amounts of the computed value. These amounts presented on the balance sheet, represent the fair value differences based on the valuation.

The fair value differences regarding the derivative financial instruments held for the fair value hedge purposes are accounted for under “Securities Trading Gains/Losses”, except for the foreign currency valuation differences. These foreign currency valuation differences are accounted for under “Foreign Exchange Gains/Losses” account. Information on Eurobond portfolio, recognized as fair value hedged items, is presented in section 3, footnote VII, 2.

Fair values of forward foreign currency purchase and sales contracts, currency and interest swap transactions are calculated by using internal pricing models based on market data. Unrealized gains and losses are reflected in the income statement in the current period.

Fair values of option contracts are calculated with option pricing models and the resulting unrealized gains and losses are reflected in the current period income statement.

Futures and swaption transactions are accounted for at settlement prices obtained from counterparties as of the balance sheet date and related unrealized gains and losses are reflected in the current period income statement.

Credit default swap transactions are accounted for at market prices as of the balance sheet date and related unrealized gains and losses are reflected in the current period income statement.

**NOTES TO FINANCIAL STATEMENTS AS OF MARCH 31, 2010**

*(Amounts expressed in Thousands of Turkish Lira (TL) unless otherwise stated.)*

**V. Interest income and expenses**

Interest income and expenses are recognized in the income statement for all interest bearing instruments on an accrual basis using the effective interest rate method. In accordance with the related regulation, the interest receivables and accruals of non-performing loans are cancelled and not recorded as interest income until collected.

**VI. Fees and commission income and expenses**

Fee and commission income and expenses are accounted for on an accrual basis, except for certain banking transactions that income is recognized immediately. Income generated through agreements or through the sale and purchases of assets on behalf of third parties, is recorded as income when collected.

Dividend income is accrued when the subsidiaries' and associates' profit distribution decisions are approved.

**VII. Financial assets**

Financial assets comprise cash and cash equivalents and the contractual right to obtain cash or another financial asset from counterparty or to exchange financial assets with counterparty or the equity instrument transactions of the counterparty. Financial assets are classified in four categories; as "Financial Assets at Fair Value through Profit or Loss", "Investment Securities Held-To-Maturity", "Investment Securities Available-For-Sale", and "Loans And Other Receivables". The classification of the financial assets is determined at the initial inception of the related financial assets.

**1. Financial assets at fair value through profit or loss**

**1.1. Trading securities**

The Bank accounts for its trading securities at fair value. The difference between interest income that has been gained by holding the trading securities and acquisition cost and fair value of the trading securities, is reflected as interest income in the income statement. If any of these financial assets are sold before their maturity, the gain or loss is realized as securities trading gains / losses.

**1.2. Financial assets at fair value through profit or loss**

The Bank has classified its mortgage loans that were initiated between January 1, 2006 – December 31, 2007, as financial assets at fair value through profit or loss in compliance with TAS 39. These loans are presented under "Financial Assets at Fair Value through Profit or Loss (Net)" in the financial statements. The Bank has not classified its mortgage loans that were initiated after January 1, 2008, as financial assets at fair value through profit or loss. Interests on related loans are presented under "Income statement" as "Interest on Loans" and fair value differences are presented as "Securities Trading Gains (Losses)".

The Bank also has government bonds in its financial assets at fair value through profit or loss portfolio.

Financial assets at fair value through profit or loss are initially recorded at cost and are measured at fair value in the following periods.

Fair value of loans that are classified as financial assets at fair value through profit or loss has been determined by using effective interest rates used for similar financial assets within the market. The fair values of public sector debt securities that are classified in the mentioned group have been determined by using the market prices as at the balance sheet date.

**Finansbank Anonim Şirketi**

**NOTES TO FINANCIAL STATEMENTS AS OF MARCH 31, 2010**

*(Amounts expressed in Thousands of Turkish Lira (TL) unless otherwise stated.)*

**2. Investment securities available for sale**

Available for sale assets represent financial assets other than financial assets at fair value through profit or loss, loans and other receivables and investment securities held to maturity.

Premiums and discounts on investments securities available-for-sale are taken into account in computing the internal rate of return and are included in interest income in the income statement. Accrued interest income on investment securities available for sale is recognized in the income statement whereas gains and losses arising from the change in the fair values of such securities are reflected in equity under "Securities value increase fund" (Unrealized Gains/Losses on Securities). When investment securities available for sale are sold, collected or otherwise disposed of, the cumulative fair value adjustments under equity is transferred to the income statement.

Some portion of the Eurobond portfolio which has been recognised as available for sale securities are designated as fair value hedged items starting from March and April 2009. Those securities are disclosed under Investment Securities Available for Sale in order to be in line with balance sheet presentation. The fair value differences of hedged items are accounted for under "Securities Trading Gains/ Losses" in the income statement.

Some portion of the government bond portfolio which were recognized as available for sale securities are designated as fair value hedged items as at April 3, 2009. The fair value differences of hedged items that are disclosed under Investment Securities Available for Sale in order to be in line with balance sheet presentation, are accounted for under "Securities Trading Gains/Losses" in the income statement. However, since the fair value hedge accounting could not be effectively continued as stated in TAS 39, the fair value hedge accounting was ceased as of May 1, 2009. The fair value differences are amortized through equity until the maturity of related hedged securities. The fair value differences of related portfolio securities sold prior to maturity are amortized through the income statement.

**3. Investment securities held to maturity**

Investments held to maturity include securities with fixed or determinable payments and fixed maturity where there is an intention of holding until maturity and the relevant conditions for fulfillment of such intention, including the funding ability and excluding loans and receivables.

As of October 1, 2008, due to the change of the intention, the Bank classified securities from trading portfolio and available for sale portfolio to held to maturity portfolio with the nominal values of TL 94,198 and TL 2,549,613, respectively. The intention of the Bank regarding the holding the held to maturity portfolio has changed in 2009. As it is stated in TAS 39, paragraph 51, "while the intention or the possibility of holding the securities until the maturity changes, or when the investments become inappropriate to be classified as held to maturity; the related investments should be classified as investment securities available for sale and should be re-measured at their fair values"; the Bank classified TL 2,643,811 nominal amount of held to maturity portfolio to available for sale portfolio effective from March 31, 2009 based on the Board of Directors' decision dated April 16, 2009. Because of this classification the Bank will not be able to classify any financial asset as held to maturity investment in 2009 and the following two years.

**4. Loans and specific provisions**

The Bank initially records loans and receivables at cost; except for the loans that are recorded with fair value through profit or loss and loans subject to fair value hedge. In the following periods, these loans are carried at amortized cost by using the effective interest rate method.

**Finansbank Anonim Şirketi**

**NOTES TO FINANCIAL STATEMENTS AS OF MARCH 31, 2010**

*(Amounts expressed in Thousands of Turkish Lira (TL) unless otherwise stated.)*

As it is mentioned in note “IV. explanations on forward, option contracts and derivative instruments”, the Bank entered into swap transactions against TL in order to hedge the possible losses which might arise due to the changes in the fair value of a certain portion of its long-term loans. The Bank accounted for the hedged part of the loan portfolio at fair value, together with the swap transactions used as the hedging instrument and the related net gain or loss was included in the income statement in accordance with TAS 39. The Bank applied fair value hedge accounting for mortgage, auto and consumer loans effective from both previous years and current period. However, since the fair value hedge accounting of mortgage and auto loans could not be effectively continued as stated in TAS 39, the fair value hedge accounting was ceased both during the previous years and current period. The fair value differences of the stated hedge accounting are amortized through income statement until the maturity of the related hedged loans.

Provision is set for the loans that maybe doubtful and amount is charged in the current period income statement.

If there is evidence for the uncollectibility of loans, the Bank classifies related loans and advances in nonperforming loans and provides specific and general provision in accordance with the Communiqué dated November 1, 2006, published on the Official Gazette No 2633 and revised with the Communiqué dated January 23, 2009, published on the Official Gazette No 2719 “Methods and Principles for the Determination of Loans and Other Receivables to be Reserved for and Allocation of Reserves”. According to the temporary second article of the revised Communiqué dated January 23, 2009, the Bank does not provide any specific provision for the loans which are not at default whereas the other loans of the same loan customer are classified as non-performing loans. The Bank provides 100% specific provision for non-performing loans, other than those loans stated above, without taking into consideration the collaterals obtained for these loans. The related provisions are charged in the current year income statement.

The Bank also provides specific provisions for the closely monitored loans as a result of risk assessment. These provisions accounted for in liabilities under other provisions as “Free Reserves for Possible Loan Losses”.

Except for specific provisions and free reserves for possible loan losses within the framework of the regulation referred to above, the Bank provides general loan loss provision and presents it in the liabilities as “General Provisions”.

The provisions provided for loans are accounted for under “Provision for Loan Losses and Other Receivables” in the statement of income.

The collections made in relation to amounts provided in the current period are offset against the “Provision for Loan and Other Receivables” in the income statement. The principal collections made related to the loans that were written-off or for which a provision was provided in the previous years are recorded under “Other Operating Income” and interest collections are recorded under the “Interest on Loans under Follow-up” account.

**VIII. Impairment of financial assets**

If the amount computed by discounting expected future cash flows of financial asset using the effective interest rate method or (if any) the fair value is lower than the carrying value of financial assets, impairment can be recognized. Provision is provided for impairment of the financial assets and recorded to related expense accounts.

**IX. Netting of financial instruments**

In cases where the fair values of trading securities, securities available-for-sale, securities quoted at the stock exchanges, associates and subsidiaries are less than their carrying values, a provision for impairment is allocated, and the net value is presented on the balance sheet.

The Bank provides specific allowances for loans and other receivables in accordance with “Methods and Principles for the Determination of Loans and Other Receivables to be Reserved for and Allocation of Reserves” and offset against overdue loans in the assets.

Financial assets and liabilities other than those explained above are offset when the Bank has a legally enforceable right to set off, and the intention of collecting or paying the net amount of related assets and liabilities or the right to offset the assets and liabilities simultaneously. Otherwise, no offsetting is made.

**NOTES TO FINANCIAL STATEMENTS AS OF MARCH 31, 2010**

*(Amounts expressed in Thousands of Turkish Lira (TL) unless otherwise stated.)*

**X. Sales and repurchase agreements and lending of securities**

Securities sold under repurchase agreements are recorded on the balance in accordance with Uniform Chart of Accounts. Accordingly, government bonds and treasury bills sold to customers under repurchase agreements are classified as “Investments Subject to Repurchase Agreements” and valued based on the Bank management’s future intentions, either at market prices or using discounting method with internal rate of return. Funds received through repurchase agreements are classified separately under liability accounts and the related interest expenses are accounted for on an accrual basis.

Securities that are subject to repurchase agreement as at the balance sheet date amounted to TL 114,805 (December 31, 2009 – TL 19,168).

The Bank does not have securities that are subject to lending transactions as of March 31, 2010 (December 31, 2009 – TL 14,218).

Securities purchased with a commitment to resell (reverse repurchase agreements) are recorded in a separate account under interbank money market takings in the balance sheet. The difference resulting from purchase and resale prices is treated as interest income and accrued over the life of the agreement.

**XI. Assets held for sale and discontinued operations**

Assets held for sale are those with highly saleable condition requiring a plan by the management regarding the sale of the asset to be disposed, together with an active program for determination of buyers as well as for the completion of the plan. Also, the asset shall be actively marketed in conformity with its fair value. On the other hand, the sale is expected to be journalized as a completed sale within one year after the classification date; and the necessary transactions and procedures to complete the plan should demonstrate the fact that the possibility of making significant changes or canceling the plan is low.

The Bank does not have assets held for sale.

A discontinued operation is a part of the Bank’s business classified as disposed or held-for-sale. The operating results of the discontinued operations are disclosed separately in the income statement.

The Bank transferred its shares of Finans Malta Holdings Ltd., which the Bank used to own 100% of the shares, by selling to NBG International Holdings B.V. on February 24, 2009. The gain on sale of TL 197,090 resulting from this sale is accounted for as “Income on sale of associates, subsidiaries and entities under common control” under “Income on Discontinued Operations” in the current period income statement. The tax charge amounting to TL 9,855 regarding the sale is accounted under “Tax Provision for Discontinued Operations”.

**XII. Goodwill and other intangible assets**

The Bank's intangible assets consist of software and intangible rights.

The intangible assets are recorded at their historical cost less accumulated amortization and provision for impairment, if any. Amortization is calculated on a straight-line basis.

Software has been classified as other intangible fixed assets. The useful life of software is determined as 5 years for periods before 2004 while the useful life for additions in 2004 and 2005 are determined as 3 years.

If there is an objective evidence of impairment, the asset's recoverable amount is estimated in accordance with the Turkish Accounting Standard 36 (TAS 36) "Impairment of Assets" and if the recoverable amount is less than the carrying value of the related asset, a provision for impairment loss is made.

There is no goodwill regarding the associates and subsidiaries in the accompanying unconsolidated financial statements.

**XIII. Tangible Assets**

The tangible assets are recorded at their historical cost less accumulated depreciation and provision for impairment, if any.

Depreciation is calculated on a straight-line basis over the estimated useful life of tangible assets. The annual rates used are as follows:

Property	2%
Movables purchased and acquired under finance lease contracts	7% - 25%

Depreciation is calculated on a pro-rata basis for the assets that have been placed in use for less than a year as of the balance sheet date.

Net book value of the property and leased assets under financial lease contracts are compared with the fair values determined by independent appraisers as of the year end and provision for impairment is recognized in "Other Operating Expenses" in the related period income statement when the fair value is below the net book value in accordance with "Turkish Accounting Standard on Impairment of Assets" (TAS 36).

Gains or losses resulting from disposals of the tangible assets are recorded in the income statement as the difference between the net proceeds and net book value of the asset.

Expenses for repairs are capitalized if the expenditure increases economic life of the asset; otherwise they are expensed.

There are no changes in the accounting estimates, which could have a significant impact on the current and future financial statements. There are no pledges, mortgages or other restrictions on the tangible assets.

There are no purchase commitments related to the fixed assets.

**XIV. Leasing transactions**

Fixed assets acquired under finance lease contracts are presented under “Tangible Fixed Assets” on the asset side and under “Financial Lease Payables” on the liability side at the initial date of the lease. The basis for the determination of related balance sheet amounts is the lower of fair value of the leased asset and the present value of the lease payments. The direct costs incurred for a finance lease transaction are capitalized as additions to the cost of the leased asset. Lease payments include the financing costs incurred due to the leasing transaction and the principal amount of the leased asset for the current period. Depreciation is calculated on a straight-line basis over the estimated useful life of the leased assets at the rate of 20% except for the buildings which are depreciated at the rate of 2%.

Total payments made under operating leases are charged to income statement on a straight-line basis over the period of the lease.

The Bank has no leasing transactions as lessor.

**XV. Provisions and contingent liabilities**

Provisions, other than specific and general provisions for loans and other receivables, and contingent liabilities are provided for in accordance with TAS 37 “Provisions, Contingent Liabilities and Contingent Assets”. Provisions are accounted for immediately when obligations arise as a result of past events and a reliable estimate of the obligation is made by the Bank. Whenever the amount of such obligations cannot be measured, they are regarded as “contingent”. If the possibility of an outflow of resources embodying economic benefits becomes probable and the amount of the obligation can reliably be measured, a provision is recognized.

Provisions made during the period are recorded under “Other Operating Expenses”; provisions that were booked in the prior periods and released in the current year are recorded under “Other Operating Income”.

**XVI. Obligations of the Bank for employee benefits**

Provision for employee severance benefits has been accounted for in accordance with TAS 19 “Employee Benefits”.

In accordance with the existing social legislation in Turkey, the Bank is required to make lump-sum termination indemnities including retirement and notice payments to each employee whose employment is terminated due to resignation or for reasons other than misconduct. The retirement pay is calculated for every working year within the Bank over salary for 30 days or the official ceiling amount per year of employment and the notice pay is calculated for the relevant notice period time as determined based on the number of years worked for the Bank.

The Bank has reflected the retirement pay liability amount, which was calculated by an independent actuary, in the accompanying financial statements.

The Bank does not have any employees who work under limited period contracts with remaining terms longer than 12 months after the balance sheet date.

Provision for the employees’ unused vacations has been booked and reflected to the financial statements.

There are no foundations, pensions or similar associations of which the employees are members.

**NOTES TO FINANCIAL STATEMENTS AS OF MARCH 31, 2010**

*(Amounts expressed in Thousands of Turkish Lira (TL) unless otherwise stated.)*

**XVII. Taxation**

**1. Corporate tax**

In accordance with the Corporate Tax Law No. 5520 published in the Official Gazette No. 26205 dated June 21, 2006, effective from January 1, 2006, statutory income is subject to corporate tax at 20%. Advance corporate taxes paid are followed under current tax liability account and are deducted from the corporate taxes of the current year.

Companies file their tax returns between the 1<sup>st</sup> and the 25<sup>th</sup> day of the fourth month following the closing of the fiscal year to which they relate and the payments are made until the end of that month.

The provision for corporate and income taxes for the period is reflected as the “Current Tax Liability” and “Current Tax Provision” in the income statement.

Effective from April 24, 2003, statutory income, including retained earnings from 2002 and before, is not subject to withholding tax if retained, or transferred to share capital or distributed as dividend to the full fledged taxpayer corporations. However, it is subject to withholding tax at 10% if distributed as dividend to fully fledged individual taxpayers, who are exempt from corporate and income taxes, non-resident taxpayer companies (except for those companies having local offices or representatives) and non-resident individual taxpayers. The withholding tax was increased to 15% by the Resolution of the Council of Ministers No 2006/10731, dated July 22, 2006.

**2. Deferred taxes**

In accordance with TAS 12 “Income Taxes”, the Bank accounts for deferred taxes based on the tax effect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets and liabilities of the Bank have been offset and presented as net in the balance sheet. Deferred tax liability amounting to TL 44,820 has been disclosed in the accompanying financial statements (December 31, 2009 - TL 83,168).

As of March 31, 2010, deferred tax benefit resulting from temporary differences is TL 35,703 (March 31, 2009 – TL 18,414). The deferred tax charge, (benefit) is reflected in “Provision for Deferred Taxes” in the accompanying income statement.

Deferred taxes directly related to equity items are recognized and offset in related equity accounts. The deferred tax asset amounting to TL 20,632 (December 31, 2009 – TL 23,277) has been offset with “Securities Value Increase Fund” account under equity.

**XVIII. Additional explanations on borrowings**

The Bank generates funds from domestic and foreign sources when this is necessary. The funds borrowed from foreign sources are mainly in the form of syndications and securitizations. The funds borrowed are measured at amortized cost by using the internal rate of return method.

The Bank has not issued convertible bonds. There are no debt instruments directly issued by the Bank. The funds obtained through the debt instruments issued by the special purpose vehicles (SPV’s) are classified under funds borrowed.

**XIX. Share issues**

There is no share issues in the current period.

**Finansbank Anonim Şirketi**

**NOTES TO FINANCIAL STATEMENTS AS OF MARCH 31, 2010**

*(Amounts expressed in Thousands of Turkish Lira (TL) unless otherwise stated.)*

**XX. Confirmed bills of exchange and acceptances**

Confirmed bills of exchange and acceptances are realized simultaneously with the customer payments and recorded in off-balance sheet accounts as possible debt and commitment, if any.

There are no acceptances and confirmed bills of exchange presented as liabilities against any assets.

**XXI. Government incentives**

As of March 31, 2010, the Bank does not have any government incentives or grants.

**XXII. Segment reporting**

In addition to corporate banking, consumer banking and commercial banking services, the Bank also provides private banking, SME banking, treasury operations and credit card services through branches and alternative channels. The Bank serves its consumer banking clients with demand, time deposits, also installment-based cash advance services, direct debit account services, consumer loans, vehicle loans, housing loans and investment fund services. The Bank provides services including deposit and loans, foreign trade financing, forward and option agreements to its corporate clients. The Bank also serves in trading financial instruments and treasury operations.

The calculations based on the income statement on corporate and commercial banking, consumer banking, SME banking, plastic cards, that have operational units designated as the main profit centers, have been made according to the product and customer types. During the profitability calculations, the pricing of transfers among these units and treasury unit are made by using cost/return ratios that are determined by the Bank's senior management and which are updated periodically. In this pricing method, general market conditions and the Bank's internal policies are considered.

The Corporate Marketing Unit provides services to firms that are institutional, big size, that have annual revenue of TL 100,000 and higher, and multi-national firms operating in Turkey. The firms that have annual revenue between TL 10,000 and TL 100,000 are considered as "Commercial Enterprise". The Bank gives importance to the commercial segmentation in order to hedge risk and decrease the concentration of income.

The SME Banking Segment provides services to small and medium-size firms that have annual revenue between TL 2,000 and TL 10,000. The Bank offers sectoral solution packages to these small and medium-size firms.

The Consumer Banking meets the needs and expectations of the retail banking customers. The Private Banking Unit has formed and started to operate to serve customers with high level income, in a more effective way. The installments, discounts and bonus advantages are provided to the users of Card Finans in the plastic cards line. The main function of Treasury Segment is managing the liquidity of the Bank and interest and foreign currency risks resulting from market conditions. This segment is in close relation with corporate, commercial, consumer, SME and private banking units in order to increase the number of customers and the volume of transactions in treasury products of the Bank.

**INFORMATION ON FINANCIAL STRUCTURE**

**I. Explanations related to capital adequacy ratio**

As of March 31, 2010, the Bank's unconsolidated capital adequacy ratio is 17.11% (December 31, 2009 - 17.99%).

Capital adequacy ratio is calculated in accordance with the "The Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks" published in the Official Gazette No. 26333, dated November 1, 2006 and "The Regulation on Amendments to the Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks" published in the Official Gazettes No. 26669, No. 26824 and No. 27320, dated October 10, 2007, March 22, 2008 and August 15, 2009, respectively. For the calculation of the capital adequacy ratio, the accounting records prepared in compliance with the current legislation are used. Moreover, market risk value is calculated in accordance with the "The Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks" and factored into capital adequacy ratio.

The items deducted from the capital base are not included in the calculation of risk weighted assets, non-cash loans and liabilities. For the calculation of risk weighted assets, impairments, depreciation and amortization, and provisions are considered as deductions from related assets.

In the calculation of their risk-based values, non-cash loans are weighted after netting with specific provisions that are classified under liabilities and calculated based on the "Regulation on the Methods and Principles for the Determination of Loans and Other Receivables to be Reserved for and Allocation of Reserves". The net amounts are then multiplied by the rates stated in the Article 5 of "Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks".

In the calculation of the risk based values of the derivative financial instruments, such instruments are weighted again and classified according to the related risk groups after being multiplied by the rates stated in the Article 5 of "Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks".

#### II. Information on Market Risk

The Bank has established market risk operations and has taken the necessary measures in order to hedge market risk within its financial risk management purposes, in accordance with the Regulation on “Banks’ Internal Control and Risk Management Systems” and the “Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks”.

Based on the proposal of High Level Risk Committee, the Board of Directors of the Bank determines risk management strategies and policies for managing market risk and ensures periodic monitoring of the application of strategies. The Board of Directors of the Bank determines the risk limits by considering the primary risk factors and those limits are revised as seen necessary. Additionally, the Board of Directors of the Bank requires risk management group and the top management of the Bank to take necessary actions in order to identify, measure, control and manage the risks that the Bank is exposed to.

The market risk is measured by using an internal model developed with Value-at-Risk (VAR) methodology. VAR is calculated with ‘Historical Simulation’ method. ‘Bank Risk Tolerance’ is determined in order to manage the market risk efficiently and to keep the market risk within the desirable limits. Risk Management Group monitors the VAR balances daily for compliance with the Bank Risk Tolerance.

Periodic stress tests and scenario analysis are used to support results of VAR. Furthermore, conventional risk measurement methods such as cash flow projection, duration and variation analysis are also used.

The capital required for General Market Risk and Specific Risk is calculated and reported monthly in accordance with the Standard Method defined in the “Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks”.

#### III. Explanations Related to the Operational Risk

Value at operational risk is calculated with basic indicator method by using the gross profits for the last three years’ (2009, 2008 and 2007) as per the “Calculation of Value at Operational Risk” of the article (4) of “Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks” which was published in the Official Gazette No: 26333 dated November 1, 2006 and became effective as of June 1, 2007. As of March 31, 2010, the value at operational risk is amounting to TL 3,805,616 (December 31, 2009- TL 3,294,672).

**IV. Explanations related to Foreign Currency Exchange Rate Risk**

**1. Whether the Bank is exposed to foreign exchange risk, whether the effects of this situation are estimated, and whether the Board of Directors of the Bank sets limits for positions that are monitored daily**

As of March 31, 2010, the net foreign currency exposure of the Bank is TL 36,871 short position (December 31, 2009 –TL 13,342 long) resulting from on balance sheet short position amounting to TL 4,872,730 (December 31, 2009 –TL 4,852,040 short) and off balance sheet long position amounting to TL 4,835,859 (December 31, 2009 –TL 4,865,382 long). The long off balance sheet position amounting to TL 4,909,213 (December 31, 2009 – TL 4,673,511) is related with the FC/TL swap transactions performed with banks and customers. The Bank performs these transactions to manage foreign currency liquidity risk and to hedge itself from interest rate risk.

The Bank enters into foreign currency forward transactions to decrease foreign currency position risk. The Bank also engages in foreign currency and Eurobond buy-sell option transactions.

Position limit related with currency risk is determined according to Foreign Currency Net Position Standard Ratio. Measurable and manageable risks are taken within legal limits.

Foreign Currency Exchange Rate Risk is monitored along with potential evaluation differences in foreign currency translations in accordance with “Regulations on Bank’s Internal Control and Risk Management Systems”. Standard method is used in measuring foreign currency exchange rate risk on a weekly basis.

**2. The magnitude of hedging foreign currency debt instruments and net foreign currency investments by using derivatives**

The Bank does not hedge foreign currency borrowings and net foreign currency investments by derivative instruments.

**3. Bank’s spot foreign exchange bid rates as of the balance sheet date and for each of the five days prior to that date**

US Dollar purchase rate at the date of the balance sheet      TL 1.5215

**V. Explanations related to Interest Rate Risk**

Interest rate risk that would arise from the changes in interest rates depending on the Bank's position is managed by the Asset/Liability Committee of the Bank.

Interest rate sensitivity of assets, liabilities and off balance sheet items is analyzed by top management in the Asset/Liability Committee meetings held every two weeks by taking the market developments into consideration.

The management of the Bank follows the interest rates in the market on a daily basis and revises interest rates of the Bank when necessary.

The assets and liabilities of the Bank carry a positive interest yield, assets and liabilities are repriced within an average of 6 months. Consequently the Bank carries limited interest rate risk.

Besides customer deposits, the Bank funds its long term fixed interest rate TL loan portfolio with long term (up to 10 years) floating interest rate foreign currency funds obtained from international markets. The Bank changes the foreign currency liquidity obtained from the international markets to TL liquidity with long term swap transactions (fixed TL interest rate and floating FC interest rate). Therefore, the Bank not only funds its long term fixed interest rate loans with TL but also hedges itself from interest rate and maturity risk.

**VI. Explanations related to liquidity risk**

**1. The sources of the current liquidity risk of the Bank; whether the necessary precautions have been taken, whether the Board of Directors sets limits on the funds available to meet the urgent liquidity requirements and to be able to pay borrowings when they become due**

Liquidity risk represents risk of not having sufficient cash or cash inflows to meet the cash outflows completely and on time, as a result of instable cash flows. Liquidity risk may also result from inability to penetrate to market and to close open positions quickly at suitable prices and with sufficient amounts due to market disruptions or barriers. To mitigate liquidity risk, the Bank diversifies funding sources as customer deposits and funds borrowed from abroad and keep certain level of assets as cash and cash equivalents.

The Bank evaluates liquidity position on a daily basis. Cash flow projections and scenarios are analyzed every two weeks by the top management at Asset/Liability Committee meetings. Liquidity ratio, calculated monthly by the Market Risk Committee is used as preliminary indicator of the general liquidity position of the Bank. List of available limits, instruments and securities which can be used as collateral to create liquidity in the event of a possible liquidity crisis is updated weekly. Alternative funding strategies to be followed in case of a liquidity problem are evaluated within the current limits and positions to be taken are determined. Moreover, in terms of "Liquidity Emergency Action Plan" early warning signals, stress levels correlated with the level of liquidity risk and actions to be taken at each stress level are defined.

**2. Whether the payments, assets and liabilities match with the interest rates, and whether the effect of mismatch on profitability is measured, if any**

Bank's payments, assets and liabilities match with the interest rates.

**3. Internal and external sources to meet the short and long-term liquidity needs, significant sources of liquidity that are not utilized**

In order to meet urgent liquidity needs 5% (December 31, 2009 – 6%) of the balance sheet is allocated as cash balances.

**4. Evaluation of the Bank's cash flows and their resources**

Cash flows of the Bank are mainly denominated in Turkish Lira, US Dollar and Euro.

**k) Liquidation policies for uncollectible loans and other receivables:**

For the unrecoverable non performing loans under legal follow up, the loan quality, collateral quality, bona fide of the debtor and assessment of the emergency of legal follow up are considered, before applying the best practice for unrecoverable non performing loans under legal follow up. The bank prefers to liquidate the risk through negotiations with the debtors. If this cannot be possible than the Bank starts the legal procedures for the liquidation of the risk. Ongoing legal follow up procedures does not prevent negotiations with the debtors. An agreement is made with the debtor at all stage of the negotiations for the liquidation of the risk.

**l) Explanations on write-off policy:**

Unrecoverable non-performing loans in legal follow-up, for which 100% provision is provided in compliance with the “Provisioning Decree” and with no collateral that are deemed as uncollectible are written off by the Board of Directors’ decision, in accordance with the laws and regulations.
